WHAT WE DO BEST

Bespoke Manufacture & Prototyping

We can produce the highest quality of products from engineering drawings for even the most complex of projects.

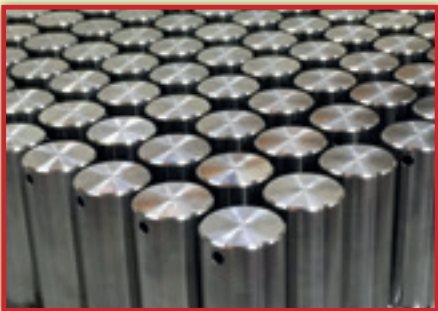

Our specialist operatives are renowned for finding solutions in innovative ways and helping bring new ideas to the market place.

Reverse Engineering

Over the years we have been presented with the challenge of recreating parts that no longer have drawings available.

Our skilled team can reverse engineer those components that you thought could not be recreated and we have a long list of success stories in this area.

Batch Production

Despite specialisms in bespoke engineering, our extensive facilities allow for very efficient batch production of parts and components. We have fulfilled such contracts across different continents and guarantee our quality, reliability and delivery.

ALLENDALE

**PERFECT QUALITY AND TURNAROUND,
EVEN ON THE MOST TECHNICAL
OF PROJECTS AND HIGHLY COST
EFFECTIVE SOLUTIONS**

**IAN SHEPHERD, PROJECT ENGINEERING
TEAM LEADER**

CAVOTEC UK LTD

We offer:

- Over 75 combined years of engineering experience and skills
- Bespoke manufacture, batch production and reverse engineering
- Full design service
- Reliability, flexibility and integrity
- Rapid project turnaround
- Competitive pricing

Our Promise

We work tirelessly to provide our customers with fantastic service and quality, at realistic prices. Our customers have some great things to say about us which shows that we are getting it right...

What Makes Us Different?

Most precision engineering companies will promise the same things in terms of quality, delivery and price. We focus on delivering on these promises, we even back this with a guarantee.

We make our customer our number one priority across all levels and aspects of our business. We respect our customers and ensure they know that we are grateful for their custom. Customer service is therefore the first and last ethos of Allendale Components Ltd.

PRECISION ENGINEERING AT ITS BEST

ALLENDALE

OUR MISSION STATEMENT

Our vision for the future

Our Mission is to provide the highest quality of service, product and experience to all of our customers, helping them to meet their goals via our cost-effective engineering solutions.

We aim to nurture our staff, helping them to develop their skills within a happy, friendly and safe environment, providing them with job satisfaction and appropriate rewards. We will welcome their ideas and thoughts in an atmosphere of total inclusion.

We aim to be environmentally responsible and to reduce our impact upon the environment in everything we do.

CAPACITY & SKILLS

Our team has over 75 combined years of experience within precision engineering. Some have served their time on manual machinery, giving them incredible knowledge and understanding of producing high quality components, now combined with the use of the latest technology. We have several trained, qualified CNC machinists.

With a range of specialist equipment that has been introduced over the years, we offer superb flexibility for even the toughest of projects. Our in-house design team also brings a wealth of design knowledge and skills.

**WE PROVIDE INTERNATIONAL STANDARDS,
YET WITH A LOCAL, FRIENDLY TOUCH...**

Machine Resource

We have 5 CNC milling machines from 3 to 5 axis, 4 CNC turning machines/lathes and a variety of ancillary equipment.

For more details on the technical specifications of our machines please visit our website at:
www.allendalecomponents.co.uk/capacity-list.html

Manufacturing Facilities

Our extensive manufacturing unit is situated on the Longbeck Trading Estate in Marske by the Sea, Redcar. We welcome pre-booked visits for our customers, suppliers and potential customers.

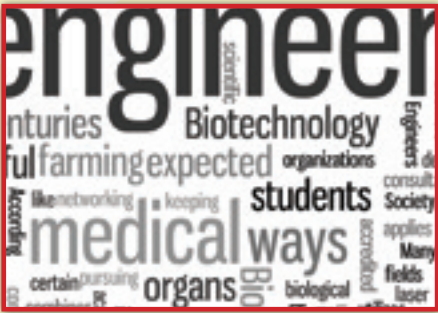

ALLENDALE

PRODUCTS, SECTORS AND MATERIALS

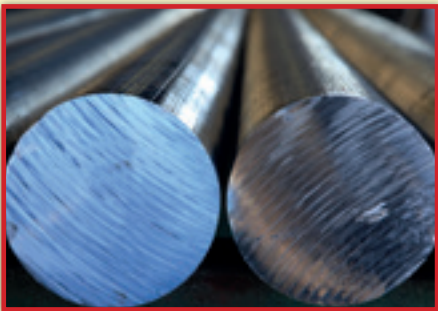

Products

Over the years we have made thousands of products including specialist bolts, valves, manifolds, flanges, bushes & pins, locking nuts and parts for testing equipment, labelling equipment, electronics, stair lifts and roller doors – if you need a part, we can machine it.

Sectors

Sector experience includes automotive, rail, aerospace, motor sport, marine, oil & gas, chemicals, manufacturing, light & heavy engineering, process, electronics and environmental. We pride ourselves in adapting to any sector requiring specialist precision engineering.

Materials

Quite uniquely, we are highly proficient in the machining of plastics. We also machine stainless steel, copper, brass, aluminium and phosphor bronze.

ALLENDALE

CONTACT US

We are based in Marske by the Sea on the North East coastline and offer all of our customers and suppliers a warm welcome.
